Course Title: General Physics(1)
Course Number: 402101
Credit Hours: 3
Pre requisite:
Placement:
Instructor: bsoul, hnasser, salehkh, amoumani,
Course Description: null
General objectives:
1. Develop a clear understanding of physical concepts in wave optics.
2. Develop the ability to deal with the physical concepts quantitatively.
3. Demonstrate the applications of modern methods to a variety of problems in optics.
4. Develop the learning skills of the student in using computers as educational tools, problem solving and demonstration.
5. Enhance the self-learning ability of the student.
Course outline:
Nature of Light
Introduction
A Brief History
Evaluation methodology:
