Course Title : Investment Principles
Course Number : 503201
Credit Hours : 3
Pre requisite :
Placement :
Instructor:
Course Description :
General objectives :
course aims and objective :
1- student understande of principle of investment
Two amounts of money payable at different times can be compared by accumulating or discounting the money to a common comparison date. The resulting equation is called an equation of value. This course contains several examples of problems which can be solved by considering two different streams of money as equivalent. Examples are given to find an initial investment value, an unknown interest rate, and an unknown length of t
